Super Farm Shelf Version 1.0

August 01, 2019

Product Overview

Super Micro Greens (SMG) is pleased to offer our first small scale and at home production shelf. Our focus has been on the systems and minimising inputs. Our systems are specialized for the first two weeks of plant growth. Grow a wide range of Micro Greens, as well as starts!

The systems are designed to be modular. This allows you, the grower, many options for adjusting the system to your needs and environment. SMG grows and delivers fresh Micro Greens fifty two weeks a year from our Indianapolis, IN location. With that being said we can guarantee that our systems will continue to advance along with the industry.

Why Super Farm Shelf Version 1.0?

- Automatic Watering (Down to the minute timing, zone specific)
- Automatic Lighting (Down to the minute timing, zone specific)
- Access schedules from your mobile device
- Join a community of growers
